

The Cyprus Question

For several decades Cyprus is divided, following the tragic events of the past. This resulted to suffer from both major communities in Cyprus, Greek Cypriots and Turkish Cypriots, with a negative impact on the young generation.

Throughout these years, several attempts and long discussions took place, aiming the solution of the “Cyprus Problem”. Unfortunately all efforts, including the latest direct discussions between the representatives of Greek Cypriots and Turkish Cypriots, failed to fulfill the will of both Cypriots and the International Community.

Having in mind a possible near-future initiative or involvement of UN and/or EU in the procedure, ECOSY-Young European Socialists reconfirms its support of the Cypriot People and also supports any attempt for a viable and just solution, based on the resolutions and parameters of UN and the principles and values of the EU, that will conclude to a Federal State with a single: sovereignty, international identity, citizenship and political equality. Our strong belief is that a viable solution of Cyprus problem will help the peace and stability in the region.
