RIGHT TO CHOICE

This congress believes in a woman's right to autonomy over her own body.

Everyday countless women are forced to travel in order to have a safe and legal abortion.

Others face imprisonment for accessing what should be a standard service for all women.

Not only is this a violation of bodily autonomy but it disproportionately affects those on low incomes

It is this congress's belief that no religion, state body or government has a right to intervene in a woman's decision regarding her own body. Moreover, we demand all governments to cover abortion with public health services, that have to be accessible and free for every woman in demand
