STANDARDIZED DISCOUNT CUSTOM FOR STUDENTS

Young European Socialists proposes that the student discount customs on public transportation would be standardized in the Europe. At the moment several different discount customs are operated, which varies between countries and even on national level. A standardized discount custom would be a step towards a universal public transport system.

Extensive collaboration also enables the compensation of costs among different service providers. The present system does not support freedom of movement nor does it help students to become international.

By approving this initiative, Young European Socialists takes a stand and will urge our governments on supporting the standardized student discount system on public transportation. This is also naturally the first step towards a more unified public transport system in the whole Europe.
